EXPERIENCE

Independent Web Developer & Architect

Jan. 2024 – Present

Freelance

- Developed and maintained high-performance client-side web applications for independent clients utilizing React.js and modern JavaScript (ES6+).
- Engineered reusable React components to overhaul legacy UI/UX, transforming static storefronts into dynamic, state-driven digital portfolios.
- Implemented responsive, mobile-first interfaces using Tailwind CSS, ensuring cross-browser compatibility and optimized rendering.
- Streamlined website load times and deployment pipelines by leveraging Vite and Vercel for continuous integration and delivery.

PROJECTS & ACHIEVEMENTS

Terra Collective (1st Place, FOSS Open Build 2025) | *React.js, Vite, React Router, Tailwind CSS, Git*

Nov. 2025

- Developed a sustainable, multi-vendor e-commerce marketplace allowing sellers to exclusively list eco-friendly products.
- Collaborated within a 4-person agile team (Stack Battalion), utilizing Git version control to manage feature branches and rapid deployments.
- Awarded 1st place out of competing teams for outstanding UI/UX design, performance efficiency, and impact-driven architecture.

KCET Acadex (1st Place, SynerTech 2026) | *React, Vite, TypeScript, Supabase, Tailwind*

May 2026

- Architected a client-side academic portal for Kashmir College of Engineering and Technology utilizing React and Vite for fast rendering and optimal performance.
- Integrated Supabase for backend architecture, managing multi-role authentication (students/faculty) and secure database queries.
- Engineered core workflows including attendance tracking, digital assignment management/submissions, leave approval systems, and official circular/notice boards.
- Awarded 1st place out of competing engineering teams for comprehensive feature completeness, scalable architecture, and intuitive UI/UX design.

Price Raptor | *React.js, Recharts, REST APIs, Tailwind CSS*

Aug. 2026

- Architected a scalable price-tracking web application designed to monitor, normalize, and compare product data across major retail platforms including Amazon, Flipkart, and Croma.
- Engineered interactive data visualizations utilizing Recharts to map historical price fluctuations, enabling users to identify optimal purchasing windows for hardware and electronics.
- Implemented asynchronous JavaScript (Fetch/Promises) to dynamically load cross-platform pricing metadata and stock availability from external APIs into a unified React dashboard.

EDUCATION

Central University of Kashmir

Bachelor's Degree

Kashmir, India

Sep. 2023 – June 2027

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks/Libraries: React.js, Tailwind CSS

Tools & Platforms: Git, GitHub, Vercel, VS Code, Figma

Core Concepts: DOM Manipulation, Responsive Web Design, REST API Integration, OOP, UI/UX Architecture
